### **Duane Habecker - YouTube**

"With their sense of number expanded to include negative numbers, in Module 4 students begin formal study of algebraic expressions and equations. Students learn equivalent expressions by continuously relating algebraic expressions back to arithmetic and the properties of arithmetic (commutative, associative, and distributive). They write, interpret, and use expressions and equations as they ...

### **EngageNY Units - Assessment Technology Incorporated**

"In Module 2, students study congruence by experimenting with rotations, reflections, and translations of geometrical figures. Their study of congruence culminates with an introduction to the Pythagorean Theorem in which the teacher guides students through the "square-within-a-square" proof of the theorem. Students practice the theorem in real-world applications and mathematical problems ...
