The major difference  
between supply chain  
management and  
operations

management is that  
supply chain is mainly  
concerned with what  
happens outside the  
company - obtaining  
materials and  
delivering products -  
while operations  
management is  
concerned with what  
happens inside the

improved supply-chain relationships to achieve a competitive advantage. In the late 1990s, "supply-chain management" (SCM) rose to prominence, and operations managers began to use it in their titles with increasing regularity.

## **Supply chain management - Wikipedia**

In the simplest of terms, Supply Chain

# Online Library Operations And Supply Chain

management (SCM) is what happens outside the company, whereas Operations

Management (OM) is what happens inside a company. However, the two terms are closely linked to each other and heavily dependent on each other also.

## **Difference Between Supply Chain Management and Operations ...**

# Online Library Operations And Supply Chain

Effective operations and supply chain processes can drive service, define the customer experience and enable the business to better manage costs.

However, to reach these goals, an end-to-end supply chain process must be implemented, with a comprehensive strategy rather than independent, siloed practices.
